## **WEST NILE VIRUS WEEKLY UPDATE; DEAD BIRD TOTAL CONTINUES TO GROW Eighteen More Dead Birds Test Positive for Virus**

County Vector Control officials announced today that 17 more dead crows and one Western Scrub-Jay tested positive for West Nile virus this week bringing the total 75 positive birds. They were found in the College Area, Bonita, El Cajon, Lakeside, Lemon Grove, Linda Vista, Mira Mesa, North Park, Pacific Beach, San Carlos, Solana Beach and Tierrasanta.

“As the number of West Nile virus positive results continues to increase, it is more important than ever for residents to protect themselves,” said Gary Erbeck, Director of the County Department of Environmental Health. “Follow these simple steps to prevent mosquito breeding, protect yourself from mosquito bites, and report mosquito breeding and dead birds.”

**Prevent Mosquito Breeding:** Backyard water sources are ideal breeding grounds for mosquitoes. Residents should dump or remove anything that can hold water, such as potted plants and saucers, rain gutters, buckets, trash cans, children’s toys, old spare tires and wheelbarrows. Mosquito fish are available for free at 13 locations around the county, and may be used to control mosquito breeding in backyard water sources such as unused swimming pools, ponds, fountains and horse troughs.

**Protect Yourself from Mosquito Bites:** You can protect yourself from the virus by staying inside when mosquitoes are most active at dawn or dusk, or by wearing long sleeves and pants when outdoors at these times. Use insect repellents containing DEET, Picaridin or Oil of Lemon Eucalyptus when you are outdoors. Keep screens on doors and windows, and make sure the screens are in good condition.

**Report Mosquito Breeding and Dead Birds:** Vector Control staff continues to pick up and test dead crows, ravens, jays, hawks and owls that are reported. Call Vector Control for instructions on how to deal with the bird. Dead birds do not need to be reported if: they have been dead more than 24 hours; have been hit by a car, shot, or killed by animals; are covered with ants or flies; have a foul odor; or bodies are not intact.

To report dead birds, mosquito breeding areas, inoperative swimming pools, or standing water, please call County Vector Control at 858-694-2888. For more information about the West Nile virus, call the County’s West Nile virus information line at 888-551-INFO (4636), or visit the County’s West Nile virus Web site at [www.SDFightTheBite.com](http://www.SDFightTheBite.com).
