

# Beach and Bay Status Report

## Water quality closures and advisories for San Diego County Beaches

*Last Updated - May 14, 2012 7:30 AM*

Signs warning of contaminated water are posted at the following locations.

**Closures** These beaches are closed to water contact due to sewage spills that may impact ocean or bay waters.

**NONE**

**Advisories** Water contact should be avoided at the following beaches due to bacterial levels that exceed health standards.

### **Torrey Pines State Beach**

Station: Los Penasquitos Lagoon Outlet. -300' North to 300' South

Status Since: May 14

Reason: Precautionary – Excavation of lagoon outlet.

### **La Jolla**

Station: Children's Pool

Status Since: Sept 1997

Reason: On-going contamination by harbor seals

### **Re-Opened**

xxxxx

---

### **Shellfish Quarantine.**

There is quarantine on mussel consumption due to risk of PSP or domoic acid poisoning for mussels taken from all coastal waters in California. For more information on the shellfish quarantine call 800-553-4133.

### **For beaches next to storm drains, rivers, and lagoon outlets:**

During dry weather, avoid contact with runoff and recreational waters within at least 75 feet from where runoff enters ocean or bay waters.

Call the DEH Beach & Bay Water Quality hotline at 619-338-2073 for updated information, or log onto the DEH web site at [www.sdbeachinfo.com](http://www.sdbeachinfo.com).
